2. (S/NF/SK) The target was Madison Square Garden in New York City. The target is a large sporting and entertainment complex consisting of a tall rectangular administrative office located next to the covered arena area.

3. (S/NF/SK) Source did a superb job of quickly acquiring the proper site and reporting accurately on the major gestalts relating to this site, i.e., "man-made, modern...circular building, different structures..." Source then moved without direction from the Interviewer, to those elements of the site which most closely identify the major gestalts such as, "people eating, drinking, amusement, winning is important, running...bouncing, crowds, noisy, heros...people walking around, observing the activity in the middle...fast activity". Source then locked-on, if you will, to the major activity gestalt of the site when she described, "a group of people, hired, people come to look a them, maybe the main reason why people come, maybe athletics". The term, "athletics" is a very pivotal expression and when tasked to focus deeper onto this concept, Source confirmed the idea of athletics when She stated, "running, wearing light clothing for movement, exhausted, winning, sweating, tired, hurt, beating each other, racing against..." Source ended the session with a remarkably accurate post-session sketch of the arena area to include the spectator bleachers and, ironically, the overhead "instant-replay" monitors. AN EXCELLENT SESSION.

I had a hard time first acquiring the site. I had first sensed an isolated area with large mountains. A natural massive setting with a man made circle or ball, glittering and shiny. I could not sense people right away. I sensed several structures - man-made. I kept sensing quite a bit of air activity - a shooting out. I sensed a pushing up feeling & a coming down effect or a floating down. I sensed a man driving like an opened cart up to the big circle.

Then after relaxing, I sensed crowds & crowds & crowds of people - children - I sensed food. I sensed many smaller structures - a structure with a big rounded roof and it was multi-colored - red. I sensed people entering & exiting - a place of amusement. I sensed a group of men like athletics & people entering & waiting an event but looking ~~up~~ sideways & I sensed cart, people could look sideways
